## GRAMMAR SCHOOL.

---

Since the publication of the last Catalogue, the Grammar School has been re-organised, on a separate and self-supporting basis, and under another name. The number of students in attendance during the year, has been 75.

Persons who wish to pursue studies in this city, preparatory to admission to the University, will find ample facilities for so doing under the advice and direction of the Faculty.

## ORGANIZATION.

---

The plan of instruction is, so adjusted as to allow any who choose, to omit the study of Latin and Greek, either throughout the course, or, with the advice of the Faculty, after the completion of the Sophomore year; substituting in their stead Modern Languages, and a more extended Mathematical and Scientific course. Hence the students in each class will be divided into two sections, corresponding to the two courses of study, and distinguished as the *Classical* and *Scientific Sections*.

The regular course for all students extends through four years; at the end of which time, those who pass a good examination in the prescribed studies, are admitted to a degree—those who have pursued the entire Classical course, to the degree of Bachelor of Arts; and those who have pursued the Scientific course, to that of Bachelor of Sciences.

Young gentlemen desiring to attend the recitations of particular departments, are allowed to do so, provided they have the requisite preparation for the studies of those departments, and become subject to the laws of the University.

## ADMISSION.

---

Candidates for admission to the University are expected to furnish satisfactory testimonials of character, and, if from another College, certificates of regular dismission.

No person will be admitted to the Freshman Class, who has not completed his fourteenth year; or to an advanced standing, without a corresponding advance in age.

Tuesday before Commencement, and the opening of the following term, are the regular times for examining candidates. The examinations may take place at other times, at the discretion of the Faculty.

Students are admitted only on examination.

## PREPARATORY STUDIES.

---

### I.—CLASSICAL COURSE.

English, Latin and Greek Grammars; Four Books of Cæsar's Commentaries, or Cornelius Nepos, Six Books of Virgil's *Æneid*, Cicero's Select Orations, Translating English into Latin, Greek Reader, Three Books of Xenophon's *Anabasis*, Geography and Arithmetic.

### II.—SCIENTIFIC COURSE.

Candidates for the Scientific Course are required to sustain a thorough examination in Spelling, Defining, Reading, Writing, Geography, English Grammar, Arithmetic, English Composition, History of the United States, Ancient History and Geography, (equal to the amount of Taylor's Manual,) and Constitution of the United States; and are recommended to pursue the study of Latin, at least one year, as a preparation for the study of English and other Modern Languages.

 Mitchell's Universal Modern Atlas.

---

### RHETORICAL EXERCISES.

The members of the Freshman and Sophomore Classes are required to present original essays, as often as once in every two or three weeks. The Juniors have further exercises in Themes, and in Forensics, until the close of the second term.

The Freshman and Sophomore Classes have a regular weekly exercise in Reading and Declamation, accompanied by criticisms and by Lectures on Delivery, by the Professor of Rhetoric.

Original Declamations are pronounced before the University by students in the third term of the Junior, and the first and second terms of the Senior year; each student being required to exhibit at least once in each term.

### PRIZE DISSERTATIONS.

A premium of        dollars will be awarded to each graduating class for the best English Dissertation on some subject previously proposed by the Faculty.

---

## LIBRARY AND READING ROOMS.

The Libraries of the University and of the Theological Seminary, amounting to nearly 10,000 volumes, are in the same room, and are open daily for consultation and for the drawing of books. All the students have access to both the Library and Reading Room, on the payment of a small fee.

---

## MINERALOGICAL CABINET, &c.

By the liberality of several gentlemen, a valuable Cabinet of Minerals has been secured. The University has a good Apparatus for experiments in Natural Philosophy and Chemistry.

---

## RELIGIOUS EXERCISES.

The public duties of each day are opened at a quarter before nine o'clock, A. M., with reading the Scriptures and Prayer, in the University Chapel. The students are required to attend, unless specially excused by the Faculty.

---

## RECITATIONS AND LECTURES.

The recitations are heard from 9 to 12 o'clock A. M., each class having three daily exercises of one hour. The number or length of these exercises may be increased at the discretion of the Faculty. On Saturday, the classes attend in the Lecture Room but one hour. Instruction is given from text books, in connection with frequent Lectures.

---

## MERIT-ROLL.

An exact daily record is kept of the attendance, conduct and recitations of each student, as well as of the sufficiency and insufficiency of the excuses rendered for delinquency. Summaries of these records are made for every term and year. Being kept in a permanent form, they will determine the standing of each student at any period of his connection with the University, and in the end will exhibit a complete history of his College course, for subsequent reference.

---

## LITERARY SOCIETIES.

Two Literary Societies, the Delphic and Pithonian, are in efficient operation, and have handsomely furnished and attractive halls for their weekly meetings.

## MORAL AND RELIGIOUS CULTURE.

It is the aim of the Faculty, in connection with the discipline of the intellect, to inculcate a pure morality, and the great truths and duties of Evangelical Christianity. The supervision of the Faculty over the students is necessarily limited, and it is important for parents to place their sons, especially those of immature age, under proper guardianship. Weekly prayer meetings are held in all the classes in the University. A Missionary Society for Inquiry, composed of members of the University and Theological Seminary, holds two public meetings monthly—one for prayer, and the other for a report on some important theme connected with the missionary enterprise.

Parents and guardians are requested to designate places of worship, at which their sons or wards shall attend regularly on the Sabbath; and, also, to entrust the general supervision of their pecuniary expenditures either to some member of the Faculty, or to some other responsible person in the City.

---
